**A worry free
alternative
for
bowed rolls!**

Durable

Versatile

Waterproof

Rapid Shipping

Corrosion free

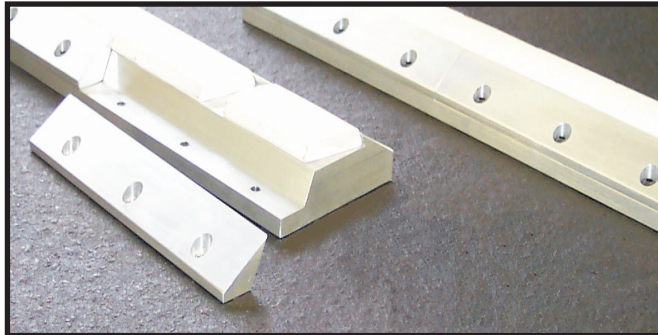

Wear resistant

Does not break

Maintenance free

Chemical Resistant

**Handles extreme
HEAT!**

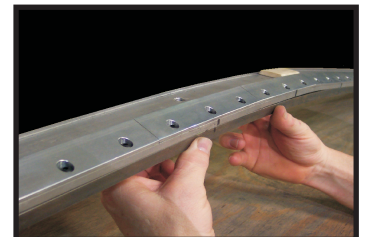

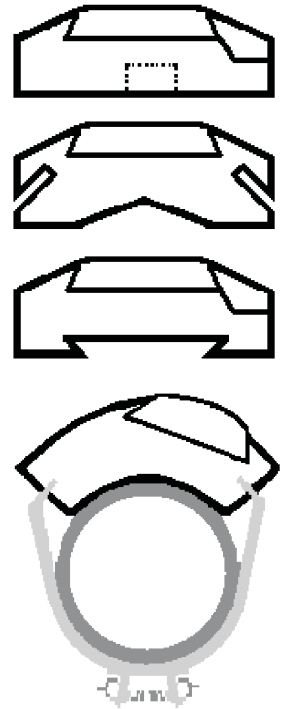

The Aluminum Oxide Spreader Bars and Shoes are made with over 100 years of experience in advanced materials composite technology.

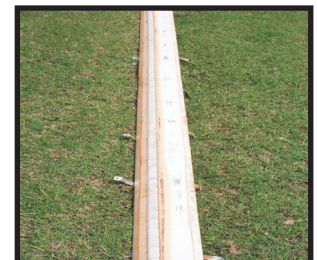

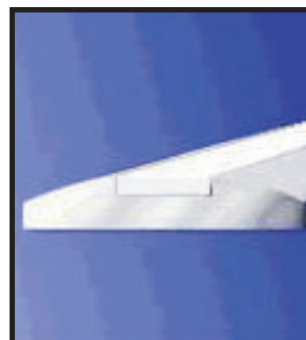

This application is a worry free solution for both the Paper and Textile Industries. This product is made of an aluminum or a composite with ceramic base inserts.

The newest design offers a way to replace ceramic inserts in-house. The different designs are made to withstand almost any type of condition related to the environment.

The first Spreader Shoe designed by us was in 1969 and it lasted until 1981. The design provides a strong resistance to wear with a long track record.

**This Successful
Application ran for over**

**Successful bar
application has run
For over 20 years.**
