

# Triple Choice

Polytron® Materials

**Now, The Choice is Yours!**

Sawyer Industrial Plastics, Inc. has material distribution all over the world. Customers want the best in suction roll packaging, but have to deal with the realities of a budget. With that in mind, we have FORMULATED Three **Polytron®** materials that give you a choice in suction roll packing!

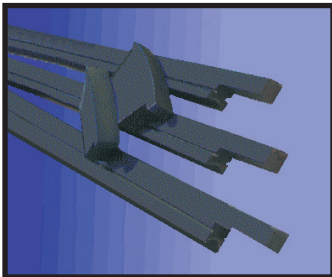

## Polytron® K-2

MANUFACTURED SINCE 1983! K-2 is the highest quality material on the market. The advantage of the Teflon® Bar helps to REDUCE ENERGY CONSUMPTION, assure a good fit, add lubrication, and to act as a built in wear gauge.

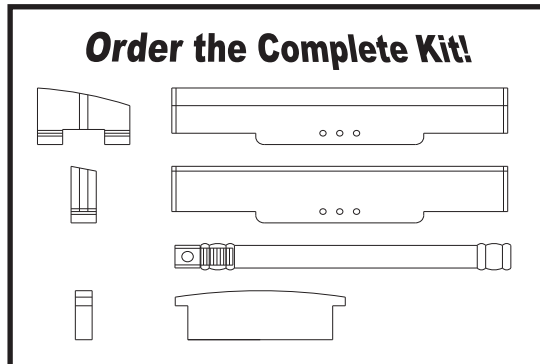

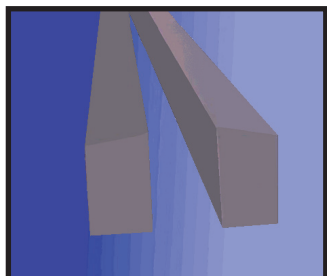

## Polytron® A-2

NEW GENERATION OF COMPOSITE GRAPHITE is the 3rd generation of Polytron® Materials. It is modeled after the K-2 material and is a quality product at a competitive price.

## Polytron® P

THE REBUILDER'S CHOICE MATERIAL was designed for mills and rebuilders that must stick to a budget. Competitive cost, still the Polytron® Quality!

## Worldwide Representation

- Polytron® Materials are:
- Strong
  - Flexible
  - Not brittle
  - Easy to install
  - Fiber reinforced
  - A competitive value
  - Lightweight in handling
  - Excellent Wear Properties
  - Resistant to harsh chemicals
  - Powdered Graphite internal lubricity
